

ATLANTIC LIGHT

ACCESS CONTROL POLICY

Despite the fact that our company encourages community/public interactions to a great extent, we do not lose control in terms of persons to be allowed free and easy access into our work areas.

However adequate control will be applied thus:

- a) Site visitors will undergo an induction exercise by security and can only gain access after the necessary clarification has been made.
- b) Movement of materials in and out of site shall be by material received and material issued vouchers.
- c) Safety warning signs will be placed in strategic positions for the purpose of warning and directing visitor's movement within the work area.
- d) Visitors to site shall be given appropriate PPE's and shall be escorted by the **ATLANTIC LIGHT'** representative on site, preferably the site Safety Officer, as conditions for admittance.

ANUGE FREDINAND
